DEPARTMENT OF ZOOLOGY
EXTENSION ACTIVITY
(AWARENESS ON NEUROLOGICAL DISORDERS)

Visit to Asha Autism School

We along with Pharmacy staff and students visited Asha Autism School on 24/09/2019 to interact with School Children. Miss. Priya, member of ASHA Foundation gave introduction about Autism disorder and children behaviour with autism.

According to her in Asha school children are taken care of their basic knowledge of communication by visual teaching methods to children by making them to understand each object with visual model explanation and describing it to them in sensitive manner.

Mss. Priya also briefed about their routine work with Children in school and how children have adapted to that routine work. Most of the children there are very sensitive to the sound around them. They are not capable of focusing on single sound normally, all the sound sounds received in same frequency together.

Activities:

Our students were exposed to the learning method of Autism studies by interacting with teachers. Their teaching pattern was 2:1 i.e; for two children one teacher is provided to make teaching and handling of children better.

They even displayed the classrooms and teaching models to share the teaching methodology to us.

Later we conducted drawing and colouring activity with the children and donated few pencil boxes, crayons, Black boards to the children and to the institute.
